CLERICAL, MEDICAL, and GENERAL LIFE ASSURANCE SOCIETY.
Persons of all ages, and in every station, may assure with this Society, and the assured may reside in any part of Europe, the Holy Land, Egypt, Madeira, the Cape, Australia, New Zealand, and in most parts of North and South America, without extra charge.
FIFTH DIVISION OF PROFITS.
The FIFTH BONUS was declared in January last, and the amount varied with the different ages, from 54½ to 55 per cent. on the premiums paid, during the last five years; or from 1l. to 2l. 10s. per cent. per annum on the sums assured.
The small share of profit divisible in future among the shareholders being now provided for, without intrenching on the amount made by the regular business, the Assured will hereafter derive all the benefits obtainable from a Mutual Office, with, at the same time, complete freedom from liability, secured by means of a ample Proprietary Capital—thus combining, in the same office, all the advantages of both systems.
A copy of the last report, setting forth full particulars, with a prospectus, can now be obtained of any of the Society's agents, or by addressing a line to
GEO. H. PINCKARD, Resident Secretary.

IMPERIAL LIFE INSURANCE COMPANY, 1, Old Broad-street, London.
Thomas Newman Hunt, esq. Chairman.
John Horsley Palmer, esq. Deputy-Chairman.
A New Scale of Premiums on Assurances for the whole term of life has recently been adopted, by which a material reduction has been made at all ages below 60 years.
Four-fifths, or 80 per cent. of the Profits, are assigned to Policies every fifth year, and may be applied to increase the sum insured, to an immediate payment in Cash, or to the reduction and ultimate extinction of future premiums.
One-third of the Premium on Insurances of 200l. and upwards, for the whole term of life, may remain as a debt upon the policy, to be paid off at convenience, by which means 1,000l. may be insured for the present outlay otherwise required for 1,000l.
Loans.—The Directors will lend sums of 50l. and upwards on the security of Policies effected with this Company for the whole term of life, when they have acquired an adequate value.
Security.—Those who effect Assurances with this Company are protected by its large Subscribed Capital from the risk incurred by Members of Mutual Societies.
Insurances without participation in Profits may be effected at reduced rates. SAMUEL INGALL, Actuary.

G. BELL and CO. Steam Mills, 8, Wellington-street, Gosset-street, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.—The PERMANENT WHITE of the Ancients, by its excellence hitherto restricted to the use of the artist, is now offered at the price of the ordinary white lead.
Four years since the proprietors placed their manufacture on a large scale, and put this elegant Paint to competition with White Lead.
Its confessed superiority over every other paint hitherto known brought forward various imitations.
These inferior productions, frequently made from zinc ores, containing lead, arsenic, and other deleterious material, alike injurious to health, deficient in body, and reducing the preservative properties for which the original paint stands pre-eminent.
In justice to the proprietors these should not be confounded with the original, even though sold under the pretence that it is all the same.
Hubbuck's paint is entirely free from any injurious properties whatever; it is healthful in the manufacture, healthful in use, and healthful to occupants of rooms newly painted with it.
As a guard to the painter against the substitution of the inferior paints, each cask is stamped
"HUBBUCK, LONDON, PATENT."
and if the cask has not been so marked, the reason is obvious.
The powdered White Zinc also may be had for grinding in oil, also for use for porcelain cards, for Japanners, for gutta percha, and for plaster decorations, and the other purposes where it is used with size, gum, varnish, spirit, &c. &c.
A circular with full particulars may be had of THOMAS HUBBUCK and SON, Colour Manufacturers, opposite the London Docks.

PURE PATENT WHITE ZINC PAINT, from the VIEILLE MONTAGNE ZINC MINING COMPANY of BELGIUM.—This PAINT is superior to every respect to white lead; it is unequalled in whiteness, and grows very hard after being applied, and is, therefore, for interior work, susceptible of a high polish. Besides, it is entirely free from all poisonous influence, and unaffected by vapour, sulphuretted hydrogen, or any gases, and preserves its original colour, which white lead does not do.
WHITE ZINC PAINT causes none of the ravages invariably committed by white lead upon the human frame; neither painter's colic, nor paralysis, &c. &c. to which dangerous complaints the workmen and manufacturers who use it are subject, and to which persons who inhabit newly-painted apartments are also liable. Since its introduction into the United Kingdom, by the patronage of the Admiralty and the most eminent professional men have given it their preference over any other paint. The public is cautioned, that if white zinc paint is adulterated, it becomes a very inferior paint, instead of a first-rate one, and peels or washes off on outside work.
The VIEILLE MONTAGNE ZINC COMPANY imports largely from its works in Belgium WHITE OXIDE of ZINC in a dry powder, and the casks bearing their mark, VM, are only to be considered as genuine, and may be obtained, for grinding in oil, of any of their Agents, residing in the following towns, viz.: London, Liverpool, Birmingham, Hull, Newcastle, Leith, Glasgow, Bristol, Plymouth, Norwich, Ipswich, Dublin, Cork, Belfast, and Jersey.
The same article—round "pars" to a White Zinc Paint, may be also obtained from the Company's Agents of the above-mentioned localities, in likewise from their Brindisi Agents, Messrs. C. DEVAUX and Co. 63, King William-street, City, London; and Messrs. ROBT. ANDERSON and Co. Timber Bush, Leith, Scotland. Pure White Zinc Paint may likewise be purchased from Messrs. BLUNDEL SPENCE and Co. Hull.
For further particulars apply to Mr. H. F. SCHMOLL, General Agent for the United Kingdom, at the Company's offices, 12, Manchester-buildings, Westminster-bridge, London.

THE WASHINGTON CHEMICAL COMPANY, NEWCASTLE-ON-TYNE;
Manufacturers of
PATTINSON'S OXICHLORIDE of LEAD.—The Washington Chemical Company having, during the last year, established a Manufactory of Pattinson's Oxichloride of Lead on a large scale, and being able to supply it with regularity, and to execute orders without delay, now proceed to bring this new and valuable preparation of Lead before their friends and the public, quite sure that it will not, in the present age, be condemned because it is new, and that if judged by its merits, is most matter way, and finally takes its place as one of the important manufactures of this country.
Pattinson's Oxichloride of Lead is a chemical combination of one equivalent of Chloride of Lead, and one equivalent of Oxide of Lead; it being well known that common White Lead is a chemical combination of one equivalent of Oxide of Lead, and one equivalent of Carbonic Acid, constituting what is called in chemical language, Carbonate of Lead. Now there is no reason to conclude that Carbonate of Lead is the only compound of lead valuable as a paint, and still less that it should be the best compound of lead for that purpose. In point of fact it is not so, for the newly-discovered Oxichloride is, much, if not in all respects, of a superior; its colour is brilliantly white, and in a number of cases it has been tried against the best White Lead that could be obtained, and after a period of upwards of two years it has been found to retain its white colour, considerably better than the lead against which it was tried.
But the chief and by far the most important advantage it possesses is, its remarkable and very decided superiority of Body; by which term the power of covering surfaces well and extensively is understood among Painters. The attention of the discoverer was at a very early period drawn to this circumstance, and since that time the Washington Chemical Company have had abundant opportunities of placing its superiority in this important particular beyond all doubt. They have themselves performed a number of experiments, and have also caused a number of experiments to be performed, in the large way, by various practical men, to compare its covering power as compared with the best White Lead, and they now state the proportions to be as 60 to 100, that is, 60 lbs. of Oxichloride Paint will cover as much surface as 100 lbs. of the best White Lead, the mixing of oil being in the same proportion; besides this, the coating is thicker and more effective, both in and out of doors, as the Oxichloride dries into a hard, tenacious layer, more like an Enamel than paint.
In using the Oxichloride, no difference in the materials is required, which it is mixed is required. Oil and Turpentine being employed as usual both for work technically called Flatting, and for work intended to be varnished. For the use of Paper Stainers and Leather Dressers, the Oxichloride is found to be peculiarly suitable. The Washington Chemical Company strongly recommend this newly-discovered substance to the notice of consumers, both on account of its economy, and its intrinsic good qualities as a paint.
